Combinatorial process for Bulk Metallic Glasses

OCR Number: OCR 6186

Rapid Development of BMG Alloys with High Formability

High-Throughput Characterization

\[ F \propto \frac{h}{S} \]

Compositional Library

- Gas Releasing Agents
- (GRAs)
- (GRAs) Si
- Steel

Al
10-30 %

Cu
30-60 %

Zr
30-55 %

Combinatorial Sputtering
High-Throughput Characterization of Formability

\[ F \propto \frac{h}{S} \]

A. Si Mold

B. BMG

C. MG Film

~3000 compositions
Best formability composition here: $\text{Mg}_{69}\text{Cu}_{21}\text{Y}_{10}$

Best formability composition reported: $\text{Mg}_{65}\text{Cu}_{25}\text{Y}_{10}$
