Combinatorial process for Bulk Metallic Glasses

OCR Number: OCR 6186

Rapid Development of BMG Alloys with High Formability

High-Throughput Characterization

\[ F \propto \frac{h}{S} \]

Compositional Library

Steel
High-Throughput Characterization of Formability

\[ F \propto \frac{h}{S} \]

A. Si Mold

B. BMG

C. Mg Film

~3000 compositions
Mg-Cu-Y

Best formability composition here: \( \text{Mg}_{69}\text{Cu}_{21}\text{Y}_{10} \)

Best formability composition reported: \( \text{Mg}_{65}\text{Cu}_{25}\text{Y}_{10} \)
