Self-Arming Warheads (SAWs) for Antibody-Drug Conjugates (ADC)

OCR Number: OCR 6808

Description:

• About Self-Arming Warheads (SAWs)
  – SAWs caged as stable, inert Ab cargos inactive until endocytosis
  – Predicted reduced off-target toxicity:
    • activated SAWs are cell-impermeable
  – Potent (< 100 nM activity)
• Total synthesis at high efficiency
  – Total synthesis facilitates novel chemistry
  – Convergent, high-yielding route to entire framework
  – Few chromatographic purifications
  – Highly amenable to SAR
• Complete synthetic control
  – Readily conjugated
IP Status: ADC applications unpublished. Provisional patents filed. Both available under CDA.
