Self-Arming Warheads (SAWs) for Antibody-Drug Conjugates (ADC)

OCR Number: OCR 6808

Description:

- About Self-Arming Warheads (SAWs)
  - SAWs caged as stable, inert Ab cargos inactive until endocytosis
  - Predicted reduced off-target toxicity:
    - activated SAWs are cell-impermeable
    - Potent (< 100 nM activity)
  - Total synthesis at high efficiency
  - Total synthesis facilitates novel chemistry
  - Convergent, high-yielding route to entire framework
  - Few chromatographic purifications
  - Highly amenable to SAR
  - Complete synthetic control
  - Readily conjugated
IP Status: ADC applications unpublished. Provisional patents filed. Both available under CDA.
